

*Comfort
and Power*

WATER BOSS™

INDUSTRIAL WASHDOWN GUN

- Delivers more cleanup power than the competition
- Cool, comfortable grip
- Low force front trigger design
- Stainless steel internals
- Lightweight
- Non-marring materials
- No snag trigger guard
- Made in U.S.A.

ERGOTECH

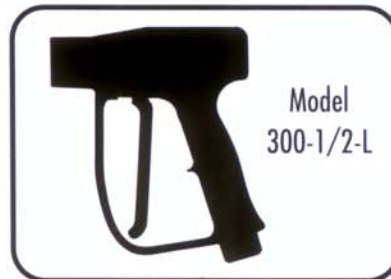

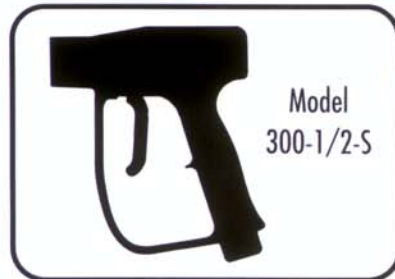

WATERBOSS™

More Cleanup Power The WaterBoss™ has been tested against all the leading washdown guns in its pressure and flow class. Its superior power delivery system moves grease and debris better and faster than the other guns. Even the fan spray position has a narrower cone to focus power where it's needed.

Cool, Comfortable Grip Only the WaterBoss™ has an insulating air pocket within the grip to keep the handle cooler during hot water cleanup.

Low Force Trigger Design Sensible front trigger comfort with a low force spring provides unsurpassed ergonomics. The WaterBoss™ actually utilizes the water pressure to close the valve, NOT A HEAVY FORCE SPRING.

Trigger Options WaterBoss™ is available with either a short or long trigger.

Stainless Steel Internals Worried about corrosion or reliability? In the WaterBoss™ all wetted metal parts are stainless steel. The WaterBoss™ has no internal parts which contain lead (unlike brass nozzles).

Lightweight At half the weight of other stainless steel or brass guns, the well balanced WaterBoss™ reduces worker fatigue.

Non-Marring Materials Tired of cleaning devices that leave black scuff marks on floors and equipment? The heavy duty fiber glass reinforced body and elastomer cushion won't leave a trace.

No Snag Trigger Guard Replacing bent or damaged triggers and putting up with the associated performance loss is a thing of the past. The WaterBoss™ has a heavy duty trigger guard which takes a pounding.

Made In U.S.A. Every component in the WaterBoss™ is manufactured and assembled in the U.S.A.

Maintenance NO TOOLS REQUIRED TO CHANGE THE VALVE SEAT! No rubber jacket to wrestle off. Simply hand loosen the rubber cushion and replace the seat. There are no adjustments necessary to obtain optimal performance.

The WaterBoss™ is precision made right, to work right.

Model 300 - 1/2, 300 psi max, 1/2" NPT, 180° F

Model 750 - 3/8, 750 psi max, 3/8" NPT, 180° F
